US Patent No. - PN (1) :

6682825

US Document Identifier - DID (1) :

US 6682825 B1

Detailed Description Text - DETX (15) :

The outer sealant layer, in film according to the present invention, can further comprise an anhydride functionality. The presence of the anhydride functionality is especially advantageous if the film is to be used in a cook-in application, and the outer sealant layer is to be in direct contact with a product comprising meat. The anhydride functionality increases the degree of meat adhesion obtained, thereby preventing purge during cook-in. This subject matter is discussed in detail in copending U.S. patent application Ser. No. 08/229,049 filed Apr. 18, 1994, entitled "Film Having Anhydride Functionality in Outer Layer, Process for Making Same, Packaging Using Same, and Packaged Product Comprising Same", which is hereby incorporated by reference thereto, in its entirety.
